 1,000
Surgical interventions
in one year, of which

800 
with a CPB pump

Referring Doctors

If you wish to send a patient for whom cardiac surgery is planned to our clinic, please report this to our case management team by ringing **+49 (0)201 / 280 22 11** or **-16**.

If you so wish, the case management team can refer you to a lead consultant immediately.

Once we have reviewed the patient's information, we will contact you, stating the diagnostic tests that your patient will need to undergo in order to have the cardiac surgery. After completion of the specialist preliminary medical examinations, a date can be set for the operation.

In urgent cases, immediate admission is possible. Direct registration with the medical on-call team is also available on a 24/7 basis for emergency cases:

Emergency telephone for referring doctors & clinics:
+49 (0) 201 – 280 22 – 585

The Essen-Huttrop Cardiac Surgery Unit is part of the West German Cardiac and Angiology Centre (WHGZ) of the Essen University Hospital Group [Universitätsmedizin Essen]. The WHGZ is a national centre for cardiovascular maximum care, meaning that it is a large pioneering research centre, where cardiac and vascular conditions are researched, diagnosed and treated. By bundling the skills of the clinics and scientific institutions, results from research can be implemented into treatment strategies faster to benefit patients.

You can park in the car park in the adjacent Elisabeth Hospital.

By public transport

From Essen Central Station:
Bus lines SB15 (quick bus), 154 and 155 to the stop "Elisabeth Krankenhaus".

Welcome

to the Huttrop Cardiac Surgery Unit

Dear Patients,

Situated at the heart of Essen, a bustling metropolis in the Ruhr region, the Essen-Huttrop Cardiac Surgery Unit has been offering cutting-edge university-supported medical care in a family atmosphere. As part of the Essen University Hospital Group, we harmoniously implement the highest medical standards in our team. You and your heart condition are the central focus of all we do.

We take the time to get to know you, and give you time to get to know us. We want to ensure that you feel as safe and well-cared for as possible before cardiac surgery, which is a significant event for all involved. We will be available for you and your loved ones around the clock, providing expertise before, during and after your surgery. Our Cardiac Surgery Unit, located in Huttrop, offers you a personalised atmosphere that you can have confidence in.

To ensure that you get back on your feet quickly after the operation, we offer you structured pain management that is tailored to your needs. Thanks to this, you can concentrate on physiotherapy exercises at an early stage. These exercises will contribute to overcoming any physical post-operative weakness you may experience and support your return to an active lifestyle.

Thank you for placing your trust in us.

Yours faithfully,

Univ.-Prof. Dr. Markus Kamler
Chief Physician & Medical Managing
Director of the Huttrop Cardiac Surgery
Unit
Professor for Thoracic Transplantation
with the Essen University Hospital Group

Our Services

- A pain-free stay thanks to structured, personalised pain management
- Operative therapy for coronary heart disease (bypass), total arterial revascularisation
- Heart valve reconstruction for damaged heart valves
- Cardiac ablation for arrhythmia
- Transcatheter valve replacement
- Heart and lung support systems in cooperation with the thoracic transplantation unit of the Essen University Hospital Group.
- Lung surgery in cooperation with the thoracic surgery department at the Ruhrland Clinic in the Essen University Hospital Group

Our patients' rooms are equipped with wifi, a TV and telephone and their own bathroom and WC.

Personal treatment by the lead consultant, a stay in an individual room and accommodation of an accompanying person can be provided if requested under the optional services.

Visiting hours:

Intensive care unit: 16:00 - 20:00

Normal ward: 14:00 - 20:00

Further visiting hours are available, following consultation with our nursing team. When visiting, please limit the maximum number of people visiting one patient to three at a time.

Please consult our nursing team beforehand if you wish to bring flowers.

Informational videos

There are three information videos on the surgical interventions that our cardiac surgery team performs on our homepage. You can access the videos directly using the following QR codes:

Bypass surgery

Artificial heart
